

# *Gloves for Mechanical & Electric Hands – Adult & Youth*

## *Elegance Gloves:*

Elegance™ cosmetic gloves are available for Bock-style electric and mechanical hands. They are generally not suitable for passive hands because they are designed for hands with an opposing thumb. When ordering a passive prosthetic hand, specify the gender and request the matching glove.

Elegance Gloves are considerably longer than most cosmetic gloves and they can be trimmed to length as required. At 25" long, these gloves are suitable for all levels of trans-radial prostheses and in some cases, trans-humeral prostheses. They have good definition for a production glove.

Elegance Gloves are available in PVC and in silicone. Tufsil 3™ Silicone is preferred for its superior stain-resistance and elasticity, although PVC may be a better choice when the glove is exposed to harsh conditions causing abrasion or tearing. Certain sizes are available in male, female or gender-neutral styles. Additionally, gloves are available in 19 colors. Therefore, you will need to select the best color match by comparing the client's skin tone to color swatches supplied by the manufacturer.
