**Mechanical Hands for Adults**

- Four adult sizes
- Voluntary open (VO)
- Adjustable grip force
- Dorsal and palmar pull cords
- Provided with inner hand shell
- Elegance™ cosmetic gloves in 19 colors - PVC or silicone

VO Dorsal and Palmar pull adult hand with inner hand shell

Designed for use with cosmetic gloves, these robust, cable-operated mechanical hands will withstand heavy-duty daily use. An active thumb and active first and second fingers provide three-point gripping. The third and fourth fingers are independently sprung to work with the first two fingers. The hand spring is adjustable, allowing a stronger or weaker grip as desired. When the operating cord is released, a positive lock automatically engages so that the user can confidently carry items weighing up to 55 pounds (25 kg). Adult mechanical hands come with the inner hand shell and will need a cosmetic glove (order Elegance™ glove separately). When ordering gloves, specify the desired color from color swatches.

These Voluntary Open mechanical hands are designed for control with either a palmar (medial) or a dorsal (lateral) pull cord, ensuring that they can be fitted to most prosthetic systems. Order appropriate wrist from WRIST section.

Adult Mechanical Hand sizes range from 2½” to 3¼”, which designates the width across the knuckles including the cosmetic glove. Mechanical hands smaller that 2½” can be found in the Mechanical Hands for Children section.

**Adult Voluntary Open Hands:**

- HA675LF 2½” Palmar Pull Hand VO, left
- HA675RF 2½” Palmar Pull Hand VO, right
- HA675LB 2½” Dorsal Pull Hand VO, left
- HA675RB 2½” Dorsal Pull Hand VO, right
